£5.70
on a
weekly
basis

Contaminated recycling containers & special uplifts of recycling containers

A charge of £27.50 will be payable for any additional uplift of recycling to a trade customer. This will be added to the standard uplift charge for that container unless the waste is not held within a waste container, in which case a no obligation quote will be provided. In addition any recycling container that cannot be collected due to contamination, will be liable for a £27.50 charge to remove the waste, which will be added to the standard uplift charge.
