Local Fire and Rescue Service Plan Priorities

The Local Fire and Rescue Service Plan has been developed to set out the priorities and objectives within East Renfrewshire and allows our local authority partners to scrutinise the performance outcomes of these priorities. We will continue to work closely with our partners in East Renfrewshire to ensure we are all **“Working Together for a Safer Scotland”** through targeting risks to our communities at a local level.

The plan has been developed to complement key partnership activity embedded across East Renfrewshire Community Plan and associated Delivery and Thematic plans. Through partnership working we will seek to deliver continuous improvement in our performance and effective service delivery in our area of operations.

The Local Fire and Rescue Plan for East Renfrewshire identified six areas for demand reduction and is subject to regular monitoring and reporting through the Police / Fire and Rescue Committee. A summary of the priorities and current activity is detailed below with further detail and analysis contained within this performance report.

	Accidental Dwelling Fires	Accidental Dwelling Fire Casualties	Unintentional Injury and Harm	Deliberate Fire Setting	Non-Domestic Fire Safety	Unwanted Fire Alarm Signals
Barrhead, Liboside & Uplawmoor	3	0	0	13	1	2
Clarkston, Netherlee & Williamwood	2	0	0	5	0	2
Giffnock & Thornliebank	2	0	4	4	0	3
Newton Mearns North & Neilston	3	0	2	14	0	4
Newton Mearns South & Eaglesham	1	0	0	4	2	0

Total Incidents	11	0	6	40	3	11
Year on Year Change	 -8%	 0%	 0%	 -17%	 -25%	 -50%
3 Year Average Change	 0%	 -50%	 0%	 22%	 -13%	 -42%

About the statistics within this report

The activity totals and other statistics quoted within this report are published in the interests of transparency and openness. They are provisional in nature and subject to change as a result of ongoing quality assurance and review. Because all statistics quoted are provisional there may be a difference in the period totals quoted in our reports after local publication which result from revisions or additions to the data in our systems. The Scottish Government publishes official statistics each year which allow for comparisons to be made over longer periods of time.

 Activity levels have reduced by more than 5%

 Activity levels have reduced by up to 5%

 Activity levels have increased overall

East Renfrewshire Activity Summary

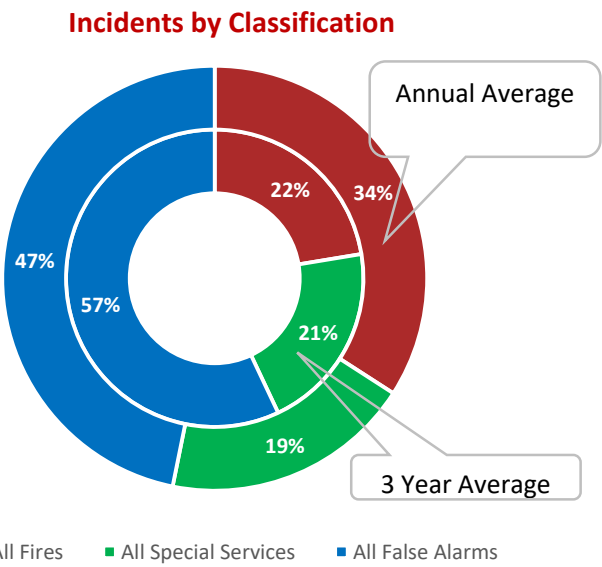

*data above is year on year change

East Renfrewshire Operational Trends

Domestic Safety - Accidental Dwelling Fires

Performance Summary

Accidental Dwelling Fires

Accidental Dwelling Fires Activity by Ward (% share)

Main Source of Ignition

Accidental Dwelling Fires by Time of Day

Severity of Accidental Dwelling Fires

Human Factors

Automatic Detection & Actuation

It is encouraging to note a reduction of 8% in the year on year indicator and no increase in the 3 year average. It is also positive that 9 out of 11 incidents had no damage at all to the premises. However, it is concerning to note that 2 of the properties did not have working smoke detection and this again confirms the benefits of our engagement during incidents and our ongoing work with partners to identify them.

Domestic Safety - Accidental Dwelling Fire Casualties

Performance Summary

Accidental Dwelling Fires Casualties

Accidental Dwelling Fire Casualties by Ward (% share)

Fire Casualties by Time of Day

Nature of Injury

Extent of Harm

Male

Age / Gender Profile

Female

It is positive to note that there were no accidental dwelling fire casualties during this reporting period and a 50% reduction on the 3 year average.

Unintentional Injury and Harm

Non-Fire Casualties by Time of Day

Non-Fire Casualties

Non-Fire Casualties by Ward (% share)

Nature of Injury

Extent of Harm

Non-Fire Emergency Activity

It is encouraging to note no increase in any of the indicators within this category. It is also important to note that all of the injuries were minor, with first aid being provided at the scene for one casualty and the remainder attending hospital for precautionary checks only.

Age / Gender Profile

Deliberate Fire Setting

Performance Summary

Deliberate Fires

Deliberate Fires by Ward (% share)

Definitions

Primary Fires - all fires in buildings, vehicles and outdoor structures or any fire involving casualties, rescues or fires attended by five or more appliances

Secondary Fires - fire incidents that did not occur at a primary location, was not a chimney fire in an occupied building, did not involve casualties (otherwise categorised as a primary incident) and was attended by four or fewer appliances.

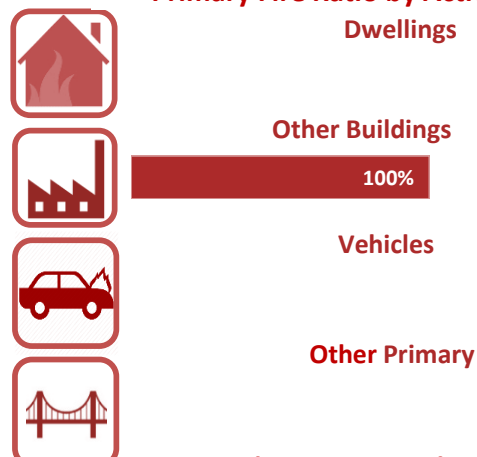

Deliberate Fires by Time of Day

Deliberate Fires by Classification

Primary Fire Ratio by Activity Type

Secondary Fire Ratio by Activity Type

Deliberate Fires Compared to Operational Activity

It is positive to note a reduction of 17% on the year on year comparator and though we have an increase of 22% on the 3 year average this includes historically low figures in 2021/22 and 2022/22. The key contributor is again refuse fires with one building fire which was due to youths setting off fireworks within a store, with no damage to the building.

Non Domestic Fire Safety

Performance Summary

Non Domestic Fires

Non-Domestic Fires by Ward (% share)

Non-Domestic Fires by Time of Day

Non-Domestic Fires by Nature of Origin

Severity of Non-Domestic Fires

Non-Domestic Fires by Premises Type

Again we have low numbers within this category with a reduction of 25% in the year on year indicator and 13% in the 3 year average. It is also positive that there was no firefighting action required in any of the incidents concerned, with only heat and smoke damage sustained.

Unwanted Fire Alarm Signals

Performance Summary

Unwanted Fire Alarm Signals

Unwanted Fire Alarm Signals by Ward (% share)

Unwanted Fire Alarm Signals by Time of Day

Unwanted Fire Alarm Signals - Top 5 Premises

Unwanted Fire Alarm Signals Activity Ratios

Average Unwanted Fire Alarm Signals per Day

It is encouraging to note a reduction of 50% in the year on year comparison and 42% on the 3 year average within this indicator. The main contributor during this reporting period is private sheltered housing complexes. There are no trends identified within the premises involved, with each incident being at a separate location.
